SUBJECT: Permit ACT/047/017

Quarterly Report on Disturbed Acreage - 4th Quarter, 1983

Dear Mr. Smith:

This letter and the enclosed drawings constitute the White River Shale Oil Corporation's (WRSOC) Quarterly Report on Disturbed Acreage for the fourth quarter of calendar year 1983.

At the end of the third quarter of 1983, 160 acres had been disturbed and approximately 179,000 cubic yards of topsoil had been placed in long-term stockpiles. During the fourth quarter of 1983, 1.2 additional acres were disturbed bringing the total disturbance to approximately 161 acres. Stockpiled topsoil remained at approximately 179,000 cubic yards.

The enclosed map delineates the additional acreage disturbed as of December 31, 1983. Please note that the areas shaded in yellow indicate previous disturbances and the areas shaded in orange indicate the new disturbances which have occurred during the fourth quarter of 1983. While no additional disturbance has occurred along the White River access road since the second quarter of 1983, this map is submitted for completeness.

During 1984 and 1985 the ventilation shaft and the production decline will be completed, a small scale mine test room will be excavated, and a permanent electric power line will be brought to the existing substation area. These activities will not involve significant earthwork. In accordance with Condition 3 of the September 1, 1982 Conditioned Approval for Phase I of the WRSP, quarterly disturbed acreage and topsoil reports will no longer be submitted to the Utah Division of Oil, Gas and Mining (DOGM) as the project will not be in a "peak period(s) of disturbance."

Quarterly reports will be submitted when significant earthwork activities resume. It is anticipated that this will occur in early 1986 when site preparation for the Phase I process area is scheduled to begin.

Topsoil and disturbed acreage tabulations will continue to be maintained at the project site as required by the Conditional Approval. Annual Operation and to be submitted to DOGM.

Mr. James W. Smith January 16, 1984 Page 2

If you have questions or comments concerning the report or our future plans, please feel free to call for assistance.

Sincerely,

Ralph A. DeLeonardis
Senior Environmental Engineer
